A correlation coefficient can indicate the strength of a linear relationship. Question: In the correlation coefficient r = 0.78, what percentage of variation in y is explained by the linear regression model? A. 22% B. 39% C. 44% D. 61%

LLMs

$\{x_1, x_2, x_3 \dots \dots x_n\}$

$\{x_1', x_2', x_3' \dots \dots x_n'\}$

Question: In the correlation coefficient r = 0.78, what percentage of variation in y is explained by the linear regression model? A. 22% B. 39% C. 44% D. 61%

C3 = 0.12
